

Cork Healthy Cities
a healthier city together

Cork Healthy Cities

Action Plan Phase VII

2020 - 2030

A city that connects to improve the health and well-being of all its people and reduce health inequalities.

**This Action Plan was co-ordinated by Dr Maria Power, Community Consultants
with a sub group of members from Cork Healthy Cities steering group**

1. Background

Background

Major health inequities persist across the world, with rates of illness and premature death significantly higher amongst the poorest and most excluded groups. This is true across countries, within countries, and most starkly within cities. As a result, groups least able to deal with the costs of illness are also those most likely to endure them. This is not a matter of chance – the poor and marginalised are more likely to live and work in environments that are harmful to health and have less access to services and amenities.

A *Healthy Cities* approach can uniquely address this and other injustices, advance health and health equity, while also advancing other sustainable development goals (SDGs). This is the overarching mission of Cork Healthy Cities.

We work on the understanding that health can be improved or harmed by social policy, transport policy, education policy and the built environment, and can particularly impact vulnerable groups in society. This is echoed in 'Health 2020' (European health policy), which puts increased emphasis on and brings new evidence to the fore on the right to health, equity, and well-being in all policies through whole-of-government and whole-of-society approaches. The urban focus of our work is also consistent with the World Health Organization's (WHO) categorisation of urbanisation

as one of the key challenges for public health in the 21st century. This is not surprising given that in addition to offering many opportunities for employment and access to better services necessary for good health and human development (health, education, social protection), cities can pose unique health risks such as air and traffic pollution, and areas of high-density deprivation.

The importance of managing and planning urbanisation in a way that advances rather than holds back health equity can only grow, with current predictions estimating 70 percent of the world's people will live in cities by 2050. We must strive to ensure that they are living in healthy and liveable cities that are 'continually creating and improving those physical and social environments and expanding those community resources which enable people to mutually support each other in performing all the functions of life and developing to their maximum potential' (Health 2020).

From Ottawa to Shanghai and the Sustainable Development Agenda

Thirty years ago, the Ottawa Charter for Health Promotion recognised the need to enable people to increase control over and improve their health and well-being by ensuring healthier, sustainable environments where people live, work, study and play. Social justice and equity were highlighted as core foundations for health, and there was agreement that health promotion is not simply the responsibility of the health sector. Subsequent WHO global health promotion conferences have reiterated these elements as key for health promotion. For example, the theme of the 9th Global Conference on Health Promotion (2016), 'Health Promotion and the Sustainable Development Goals' held in Shanghai, was both timely and necessary to ensure policy coherence and alignment of agendas for action. The slogan 'Health for All and All for Health' captures the commitment to leave no one behind and to involve all actors in a new global partnership to achieve this transformative agenda. Healthy Cities is based on a recognition that population health is not merely a product of health sector activities, but largely determined by policies and actions beyond the health sector. Socially, culturally, and politically, cities are more important than ever before. Cities are uniquely placed to provide

leadership within the complexity of multiple layers of government, numerous sectors working towards similar goals and a broadening range of stakeholders in the pursuit of health and well-being.

The 2030 Agenda for Sustainable Development, the world's ambitious and universal 'plan of action for people, planet and prosperity', includes 17 Goals, 169 targets and 231 initial indicators. The Agenda offers a new opportunity to involve multiple stakeholders to ensure that all people can fulfil their potential to live in good health, with dignity and equality.

Cork City

Cork has been a designated WHO Healthy City since January 2012. This designation places an obligation on the local authority to commit to good health outcomes and implement a process and structure to achieve this. Cork Healthy Cities also work with representatives of Healthy Cities from across Europe who work together as part of a European Healthy Cities Network. The Network meets quarterly for information sharing, identifying best practice and reaching agreement on suitable structures, mandates and statements to develop a robust collaborative approach to health and well-being improvements for all.

Since 2012, Cork Healthy Cities has used a whole-of-government and a whole-of-society approach to lead a body of interagency work that has sought to support the development of health and the reduction of health inequalities across Cork city. We have delivered strategic endeavours and action at local level, and in our first decade focussed on building strategic alliances, influencing decisions that impact health while delivering local actions to demonstrate good practice. Three key lessons identified during the early period of Healthy Cities in Cork (2012 – 2019) include the importance of:

- Buy-in, not solely from the local authority's political representatives, but also from key personnel who have the capacity to champion the Healthy Cities agenda within an agency not normally used to considering health as part of its brief.
- Co-leadership from health partners; the necessity of health knowledge and information from health service personnel and academia, and their ability to inform colleagues not normally used to sharing a health brief with other agencies/actors.
- Democratisation of the health agenda and Healthy Cities in Cork city from the start by including and increasing community representation and ensuring that health equity becomes a driving principle.

Strategically, Cork Healthy Cities has focussed on developing two interagency Cork City Profiles. The Cork City Profile compiles available local data (predominantly from the Census) and analyses that data at City and local electoral district level using a 'social determinants of health' lens. The profiles are the foundation stone informing and advocating for the reduction of health inequalities in all Healthy Cities Actions.

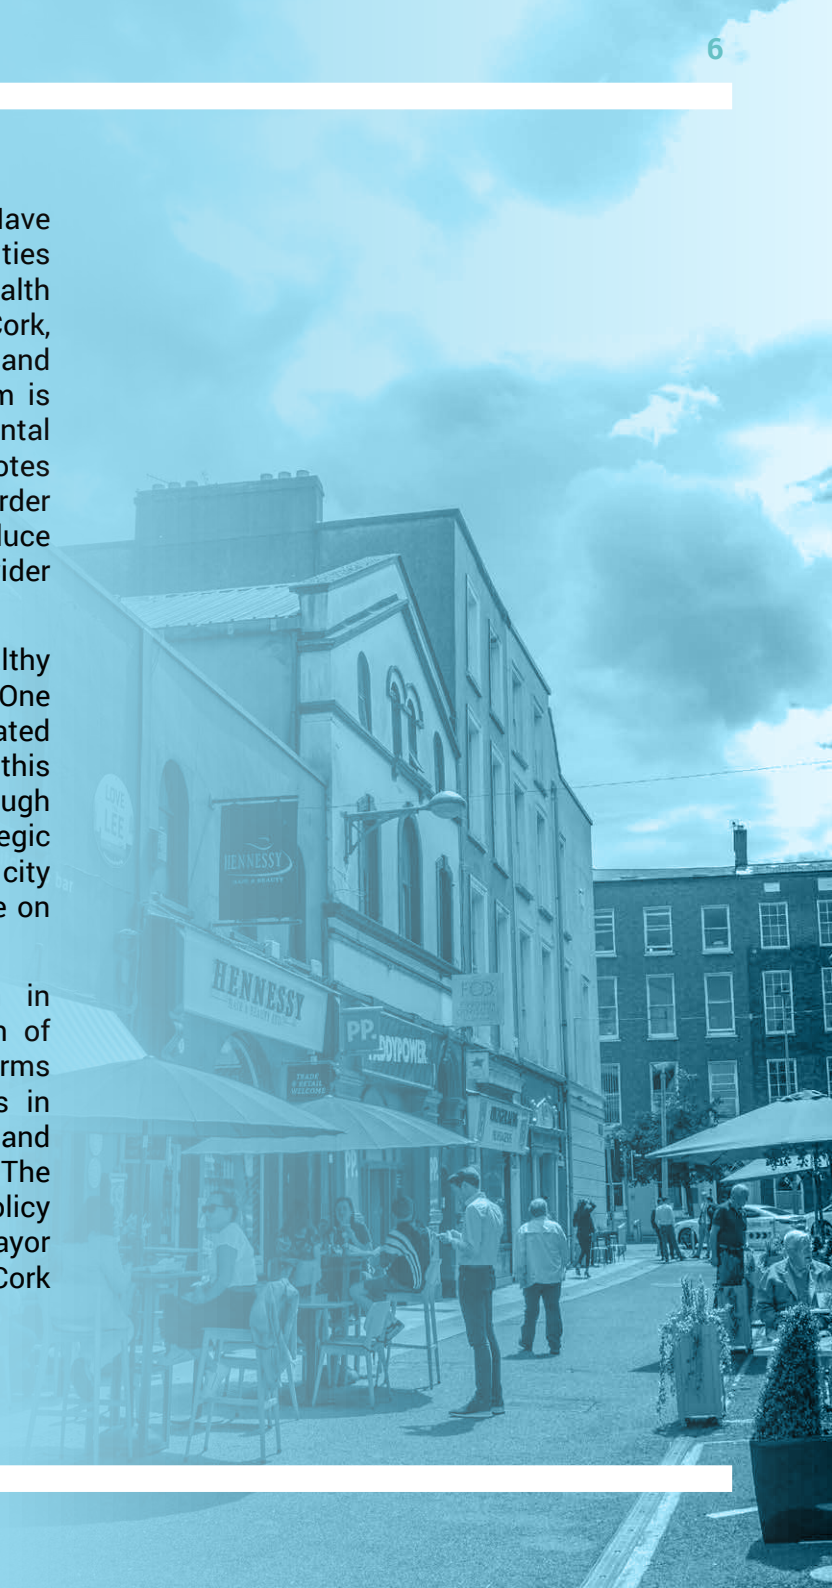

In terms of actions, Cork Healthy Cities has focussed on the development of interagency collaborations to progress the WHO Healthy Cities themes, including:

- Establishing the EcCoWeLL initiative has sought to explore interagency collaboration across the sectors of ecology & economy (Ec), community & culture (Co) and well-being & lifelong learning (Well). This approach provides a platform for integrating strategies such as Healthy City, Green City, Learning City and Sustainable Economic Development to create a blueprint that fosters quality of life and wellbeing for all citizens of Cork city. An EcCoWell Cork leadership group has been working on ways of applying this concept to Cork city and its environs and offers at least four seminars a year in Cork city on a broad range of topics, from climate change to sustainable development to mental health
- Cork Food Policy Council is a partnership for the development of a healthy and sustainable food system with representation from the community, food retail, farming, fishing, restaurant/catering, education, environmental, health sector and local authorities. Cork Food Policy Council hosts annual healthy and sustainable food awards, a sustainable food festival and oversees the development of green spaces across Cork city through the Green Spaces for Health Project.

- PSYCHED (Positive Support You Can Have Every Day) is an initiative of Healthy Cities and Counties, supported by the Health Service Executive, University College Cork, Cork City Council, Cork County Council and community workplace partners. The aim is for workplaces to get PSYCHED about mental health and wellbeing. PSYCHED promotes better mental health in workplaces, in order to increase understanding and reduce stigma towards mental illness in our wider community.

The political representative for Cork Healthy Cities is appointed through Cork City Council. One of the Council's elected members is nominated after each local election (every 5 years), and this person reports regularly to the Council through the Corporate Policy Group and the Strategic Policy Committees. At national level, Cork city holds the position of political representative on the Irish Network of Healthy Cities.

The summit of Mayors in Copenhagen in February 2018 culminated in the adoption of the **Copenhagen Consensus**, which affirms political commitment to the role of cities in creating a healthier and happier future, and acts as a political mandate for the Network. The Consensus was developed by a Strategic Policy Committee and chaired by the then Lord mayor of Cork (also the political representative for Cork Healthy Cities).

COVID-19

At the time of developing this Action Plan, March to June 2020, the City was working through the Covid-19 coronavirus pandemic. This pandemic is and will have many health impacts across the city.

Cork city supports the WHO position that cities and local governments are central in allowing us to respond and recover from this unprecedented challenge facing the world. We cannot afford to resume business as usual and must build better, healthier, and more resilient economies and societies.

The health impacts of unemployment, deprivation of education, inadequate nutrition, deteriorating mental health and isolation and physical inactivity among older adults and those with chronic illness impacts the most vulnerable populations the hardest. As we emerge from the pandemic, it seems likely that a wider gap in health inequalities will exist.

In this regard we have included an action under 'People and Place' to review responses to the Covid-19 and its impact on citizens. In particular, a review of the impact on health inequalities will be undertaken in order to understand and learn more about the implications for vulnerable groups from this crisis. Already, early evidence shows that older and vulnerable populations are hit hardest by the pandemic and those cities with reduced health inequalities are more resilient (Almagro, Orane – Hutchinson, 2020).

For many stakeholders managing our response to the virus has re-orientated how we work, e.g. from home, how we communicate and how we collaborate e.g. through

regular video and tele-conferencing. As we move forward and adopt our new Healthy Cities action plan, we will collectively need to agree new ways of working, sharing information, learnings and collaborating.

Covid-19 has also facilitated an opportunity for us to figure out how we can work better together for the greater good. It is at community level that real change happens. Communities of people, community organisations and community-based responses have been central to the pandemic response to date. Health is everyone's business. Through this Action Plan, Cork Healthy Cities will continue to value, advocate and resource community level action using multi-sectoral approaches for city wide change.

Cork Healthy Cities seeks a recovery that will be green, inclusive, sustainable, healthy, safe and deliver new economic models that are community-focused. Cork Healthy Cities support the WHO Manifesto for a green and healthy recovery and call on the global community to adopt an economy of well-being that:

1. expands the opportunities available to people for upward social mobility and for improving their lives along the dimensions that matter most to them;
2. ensures that these opportunities translate into well-being outcomes for all segments of the population, including those at the bottom of the distribution;
3. reduces health inequalities;
4. ensures environmental and social sustainability.

2. Policy Context

Copenhagen Consensus of Mayors: Healthier and happier cities for all (2018)

The vision embodied in the Copenhagen Consensus of Mayors, adopted in 2018, is fully aligned with the United Nations 2030 Agenda for Sustainable Development, and serves to guide the work of WHO Healthy Cities throughout the duration of this agenda, up until the year 2030. It is a transformative approach for safe, inclusive, sustainable and resilient societies.

Healthy Cities foster health and well-being through governance, empowerment and participation, creating urban places for equity and community prosperity, and investing in people for a peaceful planet. Healthy Cities lead by example, tackling health inequalities and promoting governance and leadership for health and well-being through innovation, knowledge sharing and city health diplomacy. Healthy Cities act as leaders and partners in tackling our common global public health challenges, including non-communicable diseases (NCDs), communicable diseases, environmental challenges, health inequalities, anti-microbial resistance, health emergencies and the pursuit of universal health coverage.

World Health Organisation/Europe: Health 2020

Health 2020 is the European health policy framework. It aims to support action across government and society to: 'significantly improve

the health and well-being of populations, reduce health inequalities, strengthen public health and ensure people-centred health systems that are universal, equitable, sustainable and of high quality'. The policy framework is evidence-based and peer-reviewed. It makes the case for investment in health and creating societies where health is valued.

Good health is vital for economic and social development and supports economic recovery. It gives policy-makers a vision, a strategic path, a set of priorities and a range of suggestions about what works to improve health, address health inequalities, and ensure the health of future generations. It values health as a human right, good health as a resource for people to realise their full potential, it emphasises collaboration, advocacy and partnership approaches in developing new innovative responses to problems and encourages participation across society and governmental levels. The two strategic objectives of Health 2020 are:

- improving health for all and reducing health inequalities
- improving leadership and participatory governance for health.

Health 2020 is the product of an extensive two-year consultation process across the -region and beyond, and was adopted by the 53 Member States of the Region during the sixty-second session of the WHO Regional Committee for Europe in September 2012.

Sustainable Development Goals: 2030 Agenda

The 2030 Agenda for Sustainable Development places renewed emphasis on the interconnected nature of our social, economic, and environmental ambitions. Health promotion efforts grounded in a Healthy Cities approach can contribute to achieving the Sustainable Development Goals (SDGs), including SDG 11: Make cities and human settlements inclusive, safe, resilient, and sustainable. The unique contributions of the successful WHO Healthy Cities programmes/movement have included a strong value-based commitment to innovations at the cutting edge of social determinants of health and Health in All Policies.

Cork Healthy Cities directly link to six of the Sustainable Development Goals of the UN, i.e. No. 2 Zero Hunger; No. 6 Clean water and sanitation; No. 11 Sustainable cities and communities; No. 12 Responsible consumption and production; No. 13 Climate Action and No. 14 Peace Justice and strong institutions.

A healthy cities approach which catalyses political leadership and participatory governance can be transformational for health and health equity, and can help mitigate the impacts of environmental degradation, climate change, ageing, migration, growing inequalities and social isolation.

Healthy Ireland: A framework for Improved Health and Wellbeing 2013 – 2025

Healthy Ireland is a national framework for action to improve the health and wellbeing of the Irish population over the coming generation. The framework places an emphasis on cross-departmental work and getting the most out of existing resources to improve the population's health and wellbeing. Health and wellbeing is an integrated theme within the policy and the way in which it is framed reflects broad public health approaches and more targeted approaches for specific concerns such as mental health. The document's high level vision is of 'A Healthy Ireland, where

everyone can enjoy physical and mental health and wellbeing to their full potential, where wellbeing is valued and supported at every level of society and is everyone's responsibility' (2013:5). The cross-governmental Healthy Ireland Framework underpins a movement that brings together people and organisations from across the country to address the social, economic and environmental factors that contribute to the development of chronic disease and to address health inequalities. Healthy Ireland has six strategic priorities, all of which link directly to the main themes of the Cork Health Cities Action Plan 2020 to 2030. These are Healthy Childhood; Healthy Eating and Active Living; Wellbeing and Mental Health; Positive Ageing; Alcohol and Tobacco free society.

In 2016, the Government approved the creation of a Healthy Ireland Fund with an initial allocation of €5 million approved in Budget 2017 to establish and support the implementation of Healthy Ireland programmes and projects in a variety of settings.

The primary aim of the fund is to support innovative, cross-sectoral, evidence-based projects and initiatives that support the implementation of key national policies in areas such as obesity, smoking, alcohol, physical activity and sexual health.

Cork Healthy Cities actions committed to under the **2020** tranche of this funding are listed in the action plan below. It is anticipated (*but not guaranteed*) that this fund will continue and evolve over the period of this funding; hence these actions will be updated every 2 years.

COMPASS: Healthy Ireland Implementation Plan 2018 – 2022

(Cork Kerry Community Healthcare)

This document sets out a clear plan for Cork Kerry Community Healthcare to assist and encourage every person across the two counties to live healthier lives. Compass provides overarching guidance and inspiration, but it also ensures that there will be clear practical measures in place to

bring about demonstrable and measurable improvements in our own health and wellbeing, in the health and wellbeing of target groups, and the wider population. 'Our key priority is that prevention is everyone's business.' This is the cornerstone in establishing a community healthcare service that understands people's needs from cradle to grave by providing services that are integrated across all areas, emphasising investment early in life, maintaining wellness, preventing illness, and providing support for the final stages of life. An increasing emphasis on prevention, early detection and self-management to improve the health and wellbeing of all our citizens aligns well with the ethos and values underpinning Cork Healthy Cities action plan 2020 - 2030.

Local Economic and Community Plan (LECP) 2016 – 2021

The development of the LECP has been described as 'a process that seeks to enhance the delivery of national social and economic policy at the local level' (Cork City Council, 2016). This plan provides in-depth analysis and description of the physical, economic and more importantly, social environment in Cork city. The Cork City LECP 'Pure Cork - An Action Plan for the City' is an integrated plan to guide the development of Cork city from an Economic, Community, Cultural, Sporting and Recreation perspective from 2016 to 2021.

"Pure Cork - An Action Plan for the City" will be used to focus the role of Local Government, State Agencies, Community Sector, Local Development Groups and other bodies that are involved in the development of Cork city. There are fifteen High Level Goals with nine of these directly connect with the priorities of the Cork Healthy Cities Plan 2020 – 2030.

These are:

- #1 **Housing:** Clearly identify and plan responses to a range of housing issues experienced in Cork city to strengthen the economic and community development of the City.
- #2 **Healthy City:** Ensure Cork is a healthy City that connects to improve the health and well-being of all its' people and reduce health inequalities.
- #3 **Community Participation:** Integrate communities and community and voluntary groups into decision making and promote civic participation and community engagement.
- #4 **Safe and Green City:** Ensure Cork is a safe and green City with a secure and sustainable environment in which to live, work and play.
- #6 **Education and Learning:** Support the culture of learning in Cork and enhance educational levels across the City.
- #7 **Social Inclusion and Equality:** Reduce the marginalisation of specific communities within the city, taking into account the nine grounds and socio-economic status.
- #8 **Children and Young People:** Develop integrated responses to the needs of children and young people and improve outcomes through local inter-agency working.
- #9 **Older People:** Develop integrated responses to the needs of older people, promoting their inclusion and contribution in all areas of life.
- #14 **Quality of Place:** Build on Cork's strong place quality assets and improve the attractiveness of the City for residents and visitors.

Cork Public Participation Network (PPN) **Health & Well-Being Statement (2019)**

The Cork City PPN has a stated vision of 'Community Wellbeing in Cork for This and Future Generations' and is reflected in six core themes. These are:

Social and Community Development in Cork: community and voluntary groups are valued and resourced for their work in creating and maintaining inclusive communities.

Values, Culture and Meaning: The city is proud and sure of what makes Cork "Cork"; history, built heritage, food, environment, language, sport, music, and the arts.

Health (mental & physical): Cork has a high standard of locally-available healthcare (physical and mental) which is universally accessible as people's needs arise.

Participation, Democracy and Good Governance: Cork people are educated and equipped to participate actively in local government and communities are encouraged to participate in a meaningful way in decision-making structures.

Environment and Sustainability: Cork city is a safe and clean environment and a rich variety of green spaces and bodies of water contribute to a healthy environment for people and wildlife.

Work, Economy & Natural resources: Cork's thriving economy is characterised by many unique, indigenous small and medium enterprises which in turn benefit the community. Workplaces in Cork are inclusive, accessible places which offer flexible conditions and a fair wage to all.

Cork City Profile 2014 & 2018

In April 2014, an interagency subgroup of Healthy Cities developed the first interagency City Profile of Cork city. Data from Census 2016, in addition to data routinely collected by the Gardaí, Fire Services, Dept. of Education / VEC, City Council, HSE and community sector was included in the profile. Based on the Social Determinants of Health model (Dahlgren & Whitehead, 1991), key health and social inclusion data was compiled on each of the 74 electoral districts in the City. This profile will be updated again in 2021 when CSO data for 2020 becomes available. The Cork City Profile provides the evidence and direction for the new Cork Health Cities Phase VII Action Plan 2020 – 2030 and this analysis is a requirement of the WHO when making an application for Healthy City status. The priorities identified in the new action plan 2020 – 2030 strive to respond to the main findings of the Cork City Profile. <http://corkhealthycities.com/cork-City-profile-2018>

The most recent Cork City Profile 2018 tells us that the population of Cork city increased over the previous five years and during that period the birth rate was one of the lowest in the country. However, the population between the working ages of 15 to 64 was 70%, which is higher than the national rate of 65.5%. Similar to most cities in the country, the population of Cork city is aging and the old age dependency rate (those age 65 and over) stood at 22.4%.

A summary of key findings of the 2018 Cork City Profile is available in the infographic (page 17).

3. Cork Healthy Cities 2020-2030

Cork Healthy Cities 2020 - 2030

At European Level this Healthy Cities Action Plan Phase VII 2020 – 2030 is guided by the six themes, identified through the Copenhagen Consensus of Mayors. These are often referred to as the six P's. These are:

- Investing in **People** who make up our cities
- Designing urban **Places** that improve health and well-being
- Greater **Participation** and partnerships for health and well-being
- Improving community **Prosperity** and access to common goods and services
- Promoting **Peace** and security through inclusive societies
- Protecting the **Planet** from degradation including through sustainable consumption and production.

This new plan from 2020- 2030 aims to strengthen the impact of Healthy Cities under these six key themes. In doing so we have developed a list of actions. Similar to previous plans, this new plan places

a strong emphasis on collaboration, health inequalities and actions linked to evidence (Cork City Profile 2018).

As new Central Statistics Office (CSO) data becomes available this may influence and/or identify new targets and goals to be included in the plan. Ten years is a significant time period to plan for where unknowns can become priorities, e.g. Covid - 19 pandemic, a review of the new action plan will take place every two years, commencing in 2023.

On completion and sign-off of this ten-year plan, a detailed action plan with specific outcomes and key performance indicators will be agreed by the steering group for each year ahead. Implementation of this one-year action plan will be monitored and accounted for regularly, with an annual report being made available to all.

Our City - what the profile tells us

In relation to minority communities, Cork city displays similar percentages to the state for Traveller families, LGBT+ people and non-Irish nationals, with 849 people seeking asylum in Cork city in 2018 and 281 people living in a direct provision centre on the Kinsale road. It must be noted in today's rising rental market, that 373 people were homeless.

When the data for the city as whole is reviewed at Electoral Division (ED) level, it emerges that a cluster of geographical areas are doing very well in socio-economic terms and there is another cluster of areas which fall well behind good living standards across several socio-economic indicators. For example, job growth for the city (9.3%) is growing at a rate higher than the national average (8.4%) and these growth areas are concentrated in the south of the city. While most of those at work are categorised in the Professional Services Sector, those in unskilled, manual or construction work live in the north side of the city where unemployment and deprivation is highest.

This is similarly true for education attainment. Those with the higher levels of education (i.e. higher secondary and third level) were from areas such as Glasheen, Bishopstown, Browningstown, Sundays Well, which are also the areas with the highest level of home ownership. These areas compare starkly to areas where the populations' highest level of education is primary or lower secondary school level and where most homes are rented from the local authority and are concentrated in Fair Hill, Gurranabraher, Farranferris, Mayfield, Knocknaheeny and the Glen. Areas with low density populations are located in Knockree, Commons and Bishopstown and the areas with high density populations are some of the most deprived areas such as Shandon, Gurranabraher, Farranferris, South Gate.

It is no surprise then that the areas with the lowest level of deprivation are those where the population have secure homes, good education and employment prospects, compared to those living in the areas of highest deprivation, who often have poor housing, poor education attainment and poor employment conditions, which contributes to poor health and wellbeing. What is concerning is that these areas are clustered together and those not doing well have not been doing well for a long time. It is important that such inequities are taken into account when planning access and delivery of services and when piloting new innovative approaches to health and wellbeing. This will require leadership that is cognisant of these disparities and leadership that is committed to social change across a range of policy platforms.

On the positive side, Cork city is well served by community and voluntary organisations across the city and across sectors including early years, youth, older persons, arts, festivals, communities of interest, the environment and climate change. Co-ordination of the community and voluntary sector is enhanced by the Public Participation Network which has a membership of over 186 groups and is committed to community development and social inclusion principles and values.

Data contained in the Cork City Profile contributes to Healthy Cities actions and planning. By collaborating, analysing data and devising informed responses, Cork city will become a healthier and more equitable city for all. The Cork City Profile is available to all agencies and organisations and provides the data and the evidence required when planning service delivery or new developments.

Cork City Profile 2020 - 2030

Cork Healthy Cities continues to be committed to responding to the evidence provided in the Cork City Profile. In particular, Cork Healthy Cities will:

- Complete the Inter-Agency Cork City Profile every four years following the publication of the census data
- Ensure that the Cork City Profile is underpinned by the Social Determinants of Health
- Ensure that the Cork City Profile outlines health inequalities in Cork city
- Ensure that the Cork City Profile highlights data gaps where they occur and advocate for the collection of data for key priority issues as identified by Cork Healthy Cities
- Undertake the widespread dissemination of the findings of the Cork City Profile.

If Cork City had a population of 100 people...

Demographics

Who Speaks what Languages

51 own and live in their own home
26 rent their home from the private sector
17 rent their home from Cork City Council

Caring

18 people have a disability

4 people are providing unpaid personal help for a friend or family member with a long term illness, health problem or disability.

Cork airport is Ireland's second busiest airport with **2.4 million** passengers each year

Diversity

15 people were not born in Ireland

2 people are seeking asylum

10 people are part of the LGBT community

5 people are part of a same-sex marriage

Life Expectancy
Traveller men **15** year less than settled men
Traveller women **12** years less than settled women

A Traveller baby in Cork is **4 times** more likely to die before it's 1st birthday than a settled baby.

Lifestyle

18 electoral divisions (EDs) are classified as 'Disadvantaged'
5 EDs are classified as 'Very Disadvantaged'

66 adults drink alcohol
58 males & **21** females binge drink

23 adults are obese
39 adults are overweight

37 eat at least 5 portions of Fruit & Veg daily

34 adults age 25-34 years old smoke cigarettes

Disease

7 people have suffered from Depression in the past year

31 die from Cardiovascular Disease

29 die from Cancer-related illnesses

Work & Learning

8 are unemployed
6 are unable to work due to a disability

47 are working

15 are students
14 have Primary education only
16 have Junior Cert only
17 have Leaving Cert only
29 have a Third Level education

Cork Healthy Cities Vision

A city that connects to improve the health and well-being of all its people and reduce health inequalities.

Cork Healthy Cities Principles and Values:

- **Equity:** addressing inequality in health and paying attention to the needs of those who are most marginalised and socially disadvantaged. The right to health applies to all regardless of sex, race, religious belief, sexual orientation, age, disability or socioeconomic circumstance.
- **Participation and empowerment:** ensuring the individual and collective right and capacity of people to participate in decision-making that affects their health, health-care and well-being.
- **Working in partnership:** building effective multi-sectoral strategic partnerships facilitating the implementation of integrated approaches and achievement of sustainable improvement in health.
- **Solidarity and friendship:** working in the spirit of peace, friendship and solidarity through networking and showing respect and appreciation of the social and cultural diversity of the cities of the Healthy Cities movement.
- **Sustainable development:** working in a manner that is environmentally and socially sustainable: meeting the needs of the present in ways that do not compromise the ability of future generations to meet their own needs.
- **Community development:** respecting and valuing community participation by advocating for a community development approach to city planning.

4. **Action Plan**

Phase VII Core Themes & Actions

Cork Healthy Cities values the development of society. Cork Healthy Cities is socially inclusive and collaborative for the benefit of communities across the city and seeks to engage with all to build trust and social cohesion through all stages of life. The ultimate ambition of Cork Healthy Cities is to continue to collaborate with key stakeholders and policy makers across the city to reduce health inequalities for the people of Cork city.

A healthy city leads by example by emphasizing a human focus to societal development and by prioritising investment in **people** to improve equity and inclusion through enhanced empowerment.

- Non-discriminatory governance process
- Non-exclusionist values-based approaches within cities
- Enhanced societal trust and community cohesion
- Universal access to essential goods and services
- Invest in health and well-being

Priority Area	PEOPLE	Partners	Time-Frame	Policy Ref
Healthy Early Years	Explore the development of a Child Friendly City in Cork city by:	CYPC, YKABC, CCC	2021 - 2030	Copenhagen Consensus, HI
	1.1 Publishing demographic data of children in the Cork City Profile			
	1.2 Engaging with the key stakeholders who will lead the Child Friendly City			
	1.3 Organising a Child Friendly City Seminar			
	1.4 Supporting the development of a Child Friendly City Steering Group			
	1.5 Supporting the delivery and implementation of a Child Friendly City Plan			
	Support the development of the Trauma Informed City by:			HI
	1.6 Publishing relevant data in the Cork City Profile		2022, 2026, 2030	LECP
	1.7 Participating in the European WHO Taskforce for Adverse Childhood Experiences	Cork City Council and partners	2020-2025	
	1.8 Providing training to frontline staff working with people affected by trauma		2020-2030	
	1.9 Promoting an understanding and commitment to the development of trauma informed services		2020-2030	
	Support the continued development of area based prevention and early intervention practice by:			
	1.10 Actively partnering with existing services and projects	YKABC and partners	2020-2030	
	1.11 Work in partnership with Libraries to promote reading, interactive apps, e-books, parents story-telling, literacy, and play	Libraries, Play Forum	2020-2030	
	Support the implementation of the Dolly Parton Imagination Library by:			LECP
	1.12 Actively participating in a working group "Dolly Parton Imagination Library" and seeking funding to deliver Dolly Parton Imagination Library in three pilot areas, namely Mahon, Knocknaheeny, Carrigtwohill and two direct provision sites including Kinsale Rd and Ashbourne House, with a view to wider area implementation	YKABC and UCC, ETB, HSE, community and voluntary organisations	2020-2022	

Healthy Older People	Support the development of Cork as an Age Friendly City through: 1.13 Publishing demographic data of over 65s in the Cork City Profile 1.14 Membership and participation on the Age Friendly Alliance/Age Friendly Forum 1.15 Building capacity and increase participation of older adults on the Age Friendly Forum 1.16 Responding to health-related needs identified in the Age Friendly forum and Alliance 1.17 Development of an Action Plan in Cork city 1.18 Delivery of actions outlined in the Action Plan	Gardaí, UCC, PHNs, Friendly Call	2020-2030 2022, 2026, 2030 2020-2030 2020-2030 2020 2020 2020-2030	HI, LECP, COMPASS

Sexual Health Centre, HSE, YHS, Gay Project, LINC, Sexual Violence Centre, Sexual Assault Treatment Centre, Cork HIV Treatment Centre, Sexual Wellbeing.ie, Man2Man	2020-2030	HI   

Cork Healthy Cities will lead by example in enhancing community places for improved health and well-being. Cork will be a city that connects people with places through inclusive urban design and planning, encouraging participation of people of all ages and abilities and advocating good health and wellbeing at local level.

A healthy city leads by example, with the social, physical, and cultural environments aligned to create a **place** that is actively inclusive, non-exploitative, and facilitates the pursuit of improved health and well-being for all.

- Human-centered urban development and planning
- Make the healthiest choice the cheapest, easiest, and most accessible choice
- Places that support health and well-being throughout the life-course
- Community and participatory governance of places
- Enhanced community resilience

	Support an EcCoWeLL approach through:			
	2.16 Delivery of four EcCoWeLL Seminars in Cork city per annum to facilitate an integrated approach to planning in Cork city			LECP
				    

A healthy city leads by example by ensuring the **participation** of all individuals and communities in all aspects of society, through participatory governance processes that are undertaken in pursuit of the common good, leading to places that facilitate improved equity, health, and well-being for all.

- Inclusive participation throughout all levels of governance and society
- Intersectoral governance within our cities through breaking the silos
- Enhanced accountability and governance coherence
- Leadership role from cities in building partnership
- Strengthen health, social, environmental literacy
- A cultural and normative shift towards common power
- Increased empowerment, agency, and individual ownership of health and well-being

Cork Healthy Cities will engage with local communities and stakeholders to strengthen health and wellbeing outcomes for all citizens. Cork Healthy Cities will ensure that all actions are participatory in nature and strive to meaningfully engage with and empower all of the people of Cork, prioritising those most in need, to shape the health of the city.

Cork Healthy Cities celebrates and embraces the diversity of its people. Cork Healthy Cities will proactively engage with people from diverse backgrounds and cultures, promoting a culture of safety and security for all citizens and championing the values of respect and tolerance to foster participation in the community.

A healthy city leads by example by promoting **peace** through inclusive societies that focus on places, participation, prosperity, and the planet, whilst putting people at the centre of all policies and actions.

- Focus on people, communities, empowerment and resilience
- Institutions, governance systems, and architecture that prioritize social justice and inclusive participation
- The promotion of cultural norms that promote inclusion and equality, are non-exploitative, and egalitarian
- Formal governance and societal norms that tackle corruption, discrimination, and all forms of violence, physical and emotional
- Role of cities in health security and response to shocks and disasters, human caused and natural

Priority Area	PEACE	Partners	Time-Frame	Policy Ref
Healthy Urban Planning and Design	Health Impact Screening & Assessment. See 2.12 to 2.14		2020-2030	HI, LECP
Health as a Bridge For Peace	Support the development of the Sanctuary City in Cork city by: 5.1 Publish relevant diversity data in the Cork City Profile 5.2 Participate and deliver actions of the health subgroup of City of Sanctuary 5.3 Support the organising of multi-cultural community events/celebrations	CCC, Sanctuary Cities partners	2020-2030	HI, LECP

Health Security	Support the Food Policy Council. See 1.27 – 1.31	CFPC	2020-2030	HI, LECP, 
Mental Health and Well-being	Support the development of the Trauma Informed City. See 1.6 to 1.9: 5.7 Pilot Trauma Informed City/neighbourhood	Trauma Sensitive Inter-Agency Group	2020-2030	HI, Compass 

Cork Healthy Cities has a strong commitment to public health in a context of climate change. Cork Healthy Cities will take a key role in environmental and health actions that make the city greener, bluer and resilient for all its citizens. Cork Healthy Cities will lead by ensuring that the protection of the planet is at the heart of all city policies. Collaborations will be strengthened to ensure improved equity, health and wellbeing for all people and improved (sustainable) planet life for the future. These actions will deliver on the goals of the New Programme for Government (Government of Ireland 2020-2025)

A healthy city leads by example by ensuring that the protection of the **planet** is at the heart of all city policies both internal and external, and coherent across all levels of governance.

- Interacts with the planet, communities, and other actors to ensure improved equity, health, and well-being for all
- Take action on climate change and environmental degradation: manage the unavoidable so as to avoid the unmanageable
- Divestment from health-harming sectors
- Coherence across levels of governance in a whole-of-city approach to create a healthier and happier planet for all

Priority Area	PLANET	Partners	Time-Frame	Policy Ref
